SUMMARY

MERN Stack Developer adept at creating dynamic web applications using **MongoDB**, **Express.js**, **React.js**, and **Node.js**. Passionate about contributing to innovative tech projects and seeking an internship to enhance my full-stack development and responsive design skills.

SKILLS

Languages: HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript, PHP, React Native, React.js, Node.js, MongoDB, Express.
Soft Skills: Analytical problem solving, Quick learning, Multitasking, Communication skills.

WORK EXPERIENCE

Shalimar Group of Companies   Sargodha, Pakistan
Junior Web Developer
Sep 2021 – Aug 2023

- Designed and developed user-friendly web pages using HTML5, CSS3, Bootstrap, and JavaScript, improving user engagement by 25%.
- Utilized PHP for backend development to create dynamic pages, which increased data processing efficiency by 30%.
- Implemented separate pages for inserting and editing multiple data entries, resulting in a 40% improvement in data accuracy and accessibility.
- Enhanced system performance by reducing page load time by 30%, significantly improving user experience.

PROJECTS

React Blog Website
- Created a React-Clone-App featuring a dynamic React.js frontend, robust Node.js backend, and secure **JWT** authentication.
- Enhanced user interaction with **Zod** validation and **Toastify** notifications.
- Included an admin panel for managing users and viewing contact responses.
  https://onlinecourses-deployment-client.vercel.app/

React Social Auth
- Developed a MERN stack application with **social authentication**.
- Integrated Google, GitHub, and Facebook login using **Passport.js**.
- Ensured secure **user authentication** and seamless login flow.
- Designed a dynamic and responsive **user interface**.

EDUCATION

Bachelor's in Computer Science   2018-2022
University of Sargodha
